Projects

The Brew Club (Live Demo) Next.js, React, MongoDB, Mongoose, NextAuth, Razorpay	Sep 2026–Present
- Developed a full-stack creator discovery and support platform enabling creators to showcase their work and receive direct contributions from supporters. - Implemented Google and GitHub authentication with NextAuth, creator profiles, search, API routes, and database-backed contribution tracking. - Integrated Razorpay Payment Links for creator-specific contributions, connecting personalized payment links with creator profiles and tracking successful transactions through Razorpay.	
Shrink URL (Live Demo) Next.js 16, React 19, Tailwind CSS v4, MongoDB	Sep 2026–Present
- Developed a full-stack URL shortening service using Next.js, React, and MongoDB for creating and managing compact links. - Implemented custom short-link generation with slug validation and collision prevention to ensure unique and valid redirect paths. - Built instant HTTP 307 redirects with a responsive interface for creating and sharing shortened URLs.	
Know Via Flutter, Dart, Riverpod, Drift SQLite, Google Gemini	Jul 2026–Present
- Developed an AI-powered Flutter knowledge-management application that transforms scattered notes into an interconnected visual knowledge graph and personalized study resources. - Integrated Google Gemini for concept extraction, semantic search, OCR, quizzes, flashcards, and study-plan generation, with structured AI results stored locally. - Built a local-first architecture using Riverpod and Drift SQLite with relational data, migrations, offline support, cached AI results, camera/gallery OCR, and Speech-to-Text.
